

GHULAM NABI AZAD COLLEGE OF COICIAL WORK PUSAD

MISSION TREE PLANTATION

EACH ONE PLANT ONE

Best Practice 1

MISSION TREE PLANTATION.

INTRODUCTION..

Importance of Trees in the present times. Trees gives us life and really very important for the survival on the earth. Many people are dependent on the tree for their survival economically for example paper industries, rubber industries, match industries, etc are totally dependent on trees. The main role of trees is giving fresh air and oxygenated air to us and consumption of CO₂. However they also give protection, shadow, food, source of money,home, medicines, etc to the people. Trees are the source of rain on the earth as they attract clouds which ultimately bring rain. They also help in checking soil erosion and keep environment fresh by preventing from pollution. They are the home of wild animals and source of wild life in forests. Trees are very helpful and useful friends of humanity. They clean soil by filtering sewage and chemicals, control noise pollution, air pollution, reduce flash flooding, etc. By seeing the importance and value of trees in our life, we shouldhonourand save trees in order to save life and environment. Trees do more to man than any other thingin the world. In fact, without trees it would be impossible for man to live. They give us

all necessities of life. They beautify our surroundings. They give shelter to countless wild animal sandbirds. They give us pleasant shade from the heat of the sun. But it is very sad that man in his greed has so far destroyed his wealth of nature. It has resulted in many grave problems for man kind like green house effect. It has resulted in the melting of glaciers of the artic circle causing untimely

floods in many countries. The average summer temperature is rising every year by 1 degree celcius.

It will be man own interest to grow trees and look after them. Seeing and understanding the importance of trees in the present times.

The benefits of planting a tree.

Trees give off oxygen that we need to breathe. Trees reduce the amount of storm water runoff, which reduces erosion and pollution in our waterways and may reduce the effects of flooding. Many species of wildlife depend on trees for habitat. Trees provide food, protection, and homes for many birds and mammals.

Tree planting is the process of transplanting tree seedlings, generally for forestry, land reclamation, or landscaping purposes. It differs from the transplantation of larger trees in arboriculture and from the lower-cost but slower and less reliable distribution of t

Many trees are indigenous and are encouraged by many to be grown to maintain natural Heritage tree plantation is not only beneficial to the environment but is also crucial in the growing trees of climate change trees are the natural purifiers of the earth that take in carbon dioxide and exhale oxygen. If we plant more and more trees they gives us fruits and leaves that serves as food for birds animals as well as human being more over we get wood, rubber and raw materials that are used for manufacturing miscellaneous goods such as furniture, doors and a lot of more. Trees are habitats of birds and animals they are maintaining biodiversity and ecological balance. Tree planting can restore global warming, therefore plantation of

tree is important as they improve the life and fulfill essential needs of mankind.

If we really want to survive or lead a good life and also want to make a comfortable globe for upcoming generations we have to aware the younger generation to plant more and more trees we must contribute our bit towards plantation. With this in mind we have devised a guide to the benefits of planting trees in our college we will take care of everything we have planted and every year we will plant trees more than the previous year. from the transplantation of larger trees in arboriculture and from Tree planting is the process of transplanting tree seedlings, generally for forestry, land reclamation, or landscaping purposes. It differs the lower-cost but slower and less reliable distribution of tree seeds.

*** Title of the Practice: MISSION Tree Plantation.**

*** Goal: To sensitize, encourage and engage students, staff, all stakeholders**

of the college and community about scientific tree plantation for increasing green coverage.

***The Context: Trees play significant role in maintaining equilibrium of the**

environment. Many ecological processes like rainfall pattern, monsoon cycle, soil cover, balancing the level of greenhouse gases and oxygen production are governed by trees. Vegetation protects wild life and provides habitat. Besides, trees have social, spiritual, commercial, medicinal significance.

The Practice:

Initially an interactive meeting of forest officials with the Principal of our college was held in our college to decide strategies of tree plantation. In response to this, the college planned to carry out tree plantation drive .college made a idea of EACH ONE PLANT ONE...that means the every person can plant a plant ,where he will be reside.It gives good result..our x student do participated in it and also relatives,friends of all faculty members ,staff and students participated in it.

Environmental awareness has become part of our college culture and the college conducts environmental awareness activity since the establishment.

EACH One PLANT ONE is a global movement with an ambitious goal to fight the climate crisis by planting trees around the world and establish green Society of India to be a healthy world.

One plant one student is an initiative in line of a green and healthy environment as a helping hand to this noble initiative and for making the college students socially responsible institution carry out a plantation drive. All faculty member staff administration and management of the institutions were also planting at least one tree themselves.

The context

One student one plant will educate and encourage the student about the benefits of planting trees for our planet. College student will be involved in searching a tree for the preservation of environment in

an eco friendly manner. One student one plant is that each student should plant one tree and also students to plant a plant at their places ,where they live. Students become climate ambassadors and pass on their knowledge and encourage other students to take on social responsibility and shape their future. Throughout the year 2020-21 our most of the students planted plant nurture that tree.

At the beginning of the two year we announced the scheme of each one plant one,that is one student one plant it under that scheme we motivate Students prepared plant by marking 1st plantation points students fill up plant with cow dung manure and soil students have planted plants of various varieties like Mango, Guava, Jackfruit, Neem.etc for plantation.

Evidences of success:

- Legal service pusad and collage planted annually.

Every year about 50-60 saplings are planted and maintained and continuous monitoring will be done by the college principal..

which provide food and shelter to many species of birds.

The College Campus is enriched with a variety of trees plant species as given bellow....

*Our collage has 1000 sq ft caridor having 2saptparni tree,okosiya 2 plant,custard apple 1,ramfal 2,saptparni 2,ratrani 1, Din ka badshaha 1,swastika flower plant 1.

*Our two stair building maintained greenery by putting 35 kundies of table pam and tresins plants.

*our collage campus have 15,000 square ft open space where planted number of plant as.....big pam plant 8,kadulimb 5,Gulmohar 3,Badam1 , Karanji 2, Saptparni 10, Okosiya 25, Flowar plant 2, Sitafal 1, Ramfal 1,Jamb/Guava 1.

*NSS adopted village Khurshi ,arranged awareness programme and guidance programme,planted plant.

*Bhavani tekadi where plantation done by nss cader and student ,staff, with collaboration of different ngos.

*placement /fieldwork student taken awareness and guidance programme at different concerning place.

*collage student ,staff,nss team planted 5000 plants with forest department under the mission 50 corer tree plantation government of maharstra project...at Khandala bit/ forest.

Problems encountered and resources required:

1. As institution is located in city area the institution does not have more space for plantation in the campus.
- 2.Plantation done but conservation,protection is difficult task.
- 3.Funding is the major problem.

Future plan

On the occasion of World Environment Day, college will distributing various varieties of trees free of cost to college students and to the society and also we will educate and encourage the people about environment protection through plantation. One student one plant will educate and encourage the student about the benefits of planting trees for our planet. College student will be involved in

searching a tree for the preservation of environment in an eco friendly

manner. One student one plant is that each student should plant one tree and also students to plant a plant at their places ,where they live. Students become climate ambassadors and pass on their

knowledge and encourage other students to take on social responsibility and shape their future. Throughout the year 2020-21 our most of the students planted plant.

सर्वांना कळविण्यात येत आहे की, आपल्या महाविद्यालयात
Tree plantation, (Each One ,Plant One) ही योजना
राबवित आहोत.....या मध्ये **एक व्यक्ती , एक झाड** ही
संकल्पना घेतलेली आहे.....तेव्हा आपण सर्वांना नम्र विनंती
की ...प्रत्येक विद्यार्थी /कर्मचारी/ प्राध्यापक यांनी आप आपल्या
गावी , वॉर्डांत, मोहल्ल्यात ...जिथे सोईचे होईल तिथे, जसे
जमेल तसे.....झाडे लावावीत ..आणि एक फोटो ग्रुप वर
टाकावा.....सोबत झाडाचे नाव, गावाचे किंवा ठिकाणचे नाव
टाकावे....या मागील मुख्य उद्देश हा , आवडीने , सोईने वृक्ष
लागवड होईल आणि नुसती लागवड नाही तर **वृक्ष संगोपन**
चांगल्या प्रकारे होईल.....
